No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1981 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 42

NUMBER 1, JULY 1981

THOMAS J. BAKER. Potential Flow Calculation by the Approximate Factorisation Method	1
G. J. PERT. Physical Constraints in Numerical Calculations of Diffusion	20
I. SAITO AND L. E. SCRIVEN. Study of Coating Flow by the Finite Element Method	53
D. B. INGHAM, P. J. HEGGS, AND M. MANZOOR. The Numerical Solution of Plane Potential Problems by Improved Boundary Integral Equation Methods	77
TOSHIO KAKIMOTO. A Simple Method to Eliminate Linearly Dependent AO Integrals in ab initio LCAO MO Calculations by Taking Advantage of Shell Structure	99
ROLF D. REITZ. One-Dimensional Compressible Gas Dynamics Calculations Using the Boltzmann Equation	108
AKIHISA KAMEARI. Transient Eddy Current Analysis on Thin Conductors with Arbitrary Connections and Shapes	124
M. L. BAART. Computational Experience with the Spectral Smoothing Method for Differentiating Noisy Data	141
EDWARD J. KANSAS. An Algorithm for Multidimensional Combusting Flow Problems	152
LAN CHIEH HUANG. Pseudo-unsteady Difference Schemes for Discontinuous Solutions of Steady-State, One-Dimensional Fluid Dynamics Problems	195
LIST OF FORTHCOMING ARTICLES	212

NUMBER 2, AUGUST 1981

Z. SCHULTEN, R. G. GORDON, AND D. G. M. ANDERSON. A Numerical Algorithm for the Evaluation of Weber Parabolic Cylinder Functions $U(a, x)$, $V(a, x)$, and $W(a, \pm x)$	213
Y. M. CHEN AND DAVID T. S. LEE. Numerical Methods for Solving Differential Equations with Inadequate Data	238
CARL E. PEARSON. Use of Streamline Coordinates in the Numerical Solution of Compressible Flow Problems	257
PAUL J. STEINHARDT AND P. CHAUDHARI. Airy Stress Function for Atomic Models	266
B. GABUTTI AND B. MINETTI. A New Application of the Discrete Laguerre Polynomials in the Numerical Evaluation of the Hankel Transform of a Strongly Decreasing Even Function	277

DAVID V. ANDERSON AND DANIEL C. BARNES. Accurate Calculations of Field-Reversed Axisymmetric Equilibria and Their MHD Stability Properties 288

MAXIMILIAN R. MAIER AND DONALD R. SMITH. Numerical Solution of a Symmetric One-Dimensional Diode Model 309

D. FYFE, A. WEISER, I. BERNSTEIN, S. EISENSTAT, AND M. SCHULTZ. A Finite Element Solution of a Reduced Fokker-Planck Equation . . . 327

J. DENAVIT. Time-Filtering Particle Simulations with $\omega_{pe}\Delta t \geq 1$ 337

A. ANDRADE, T. A. OLIPHANT, AND T. KAMMASH. Solution of the Fokker-Planck Transport Equation by Matrix Factorization 367

CHARLES F. OSGOOD. Approximating Convolution Products Better than the DFT while Keeping the FFT 382

NOTES

NIKOLAOS I. IOAKIMIDIS. A Remark on the Application of Closed and Semi-closed Quadrature Rules to the Direct Numerical Solution of Singular Integral Equations 396

M. BRANDERS, R. PIESSENS, AND M. DE MEUE. Rational Approximations for Zeros of Bessel Functions 403

T. TAJIMA, AND Y. C. LEE. Absorbing Boundary Condition and Budden Turning Point Technique for Electromagnetic Plasma Simulations . 406

LIST OF FORTHCOMING ARTICLES 413
